Q: How do I scale a PDF file to fit into a UIImageView? I have a PDF document that I would like to scale down so that the document fits completely into the frame of a UIImageView. Is there any way to do this? A: You can scale your PDF to fit into an imageView and then simply set the image to the UIImageView. A: Here is some code that will work.

```
-(UIImage *)scalePDFFile:(UIImage *)image toSize:(CGSize)size {
    UIGraphicsBeginImageContextWithOptions(size, NO, 0); float pageWidth = size.width; float pageHeight = size.height; UIGraphicsBeginPDFPageWithInfo(CGRectMake(0, 0, pageWidth, pageHeight), nil); [image drawInRect:CGRectMake(0, 0, pageWidth, pageHeight)]; UIImage* newImage = UIGraphicsGetImageFromCurrentImageContext(); UIGraphicsEndImageContext(); return newImage; }
```
