I need to change the color of that column. This link shows how to do that. But I need to do this in C#. How to change the code as per my needs? Also I have another issue. After applying the code, the column is still not getting colored. DataTable dt = new DataTable(); dt.Columns.Add(new DataColumn("Name", typeof(string))); dt.Columns.Add(new DataColumn("Description", typeof(string))); dt.Columns.Add(new DataColumn("Color", typeof(string))); dt.Columns[0].DefaultCellStyle.ForeColor = Color.Blue; dt.Columns[1].DefaultCellStyle.ForeColor = Color.Blue; dt.Columns[2].DefaultCellStyle.ForeColor = Color.Blue; A: Check out this page: Specifically this part: DataColumn myCol = new DataColumn("CustomName", typeof(string)); myCol.DefaultCellStyle.Format = "99%"; India's tech darling Flipkart has withdrawn the services of 5,000 of its workers. Flipkart and Myntra, which are both operated by Flipkart, had come under fire after a seven-week-long strike by their employees took place earlier this year. The platform recently accused its employees of disrupting sales and destroyed customer data, which resulted in big price drops. Many of these workers now accuse the company of letting down its base. What has gone wrong with Flipkart's employees? The country's leading e-commerce business is known to be a little unorganized. But that's something the employees want to change. The employees wanted a pay 2d92ce491b
