Category:Bulletin board systemsQ: Catch events with angular I have 2 lists, one list has the names of the other list, now i want to catch the event when the user clicks in the name of the other list and shows the name of the row, how can i do that? A: {{list.name}} Show List Even though we were the losing team in Game 7 of the Stanley Cup Finals, we gave the Stanley Cup to the hometown Kings, and now we can't wait to get that damn thing back. The Blackhawks thought they had their Stanley Cup, but they didn't. Sure, the Blackhawks had a great season, capped off by a Game 7 win in which they took a 2-1 lead in the Stanley Cup Final, but it was all for naught. They lost the Stanley Cup in the first overtime of Game 7, and they didn't get another chance to try to take the cup back to Chicago until June 3. And the Kings, the team from L.A. that the Blackhawks beat in five games, got a Cup and a parade, but, by all accounts, the parade is on the way back down to Chicago. Chants of "We Want the Cup" ring out at the Kings' victory parade, but the question is, who wants to have it? Does the Blackhawks? The Chicago media? The city of Chicago? We want the damn thing back. Does the team deserve the Cup, not having won the Stanley Cup in June? Yes. But this is Chicago. No one cared about Chicago in June. The Blackhawks were not in the playoffs. They weren't relevant. They were irrelevant. And they were irrelevant in the summer. So for the Blackhawks to get the Cup back now, they've got to be relevant again. They've got to be one of the top teams in the league. And right now, they're not. So they'll have to try to earn it. Should they? The Kings didn't need to win. They were in the Finals, and they had home-ice advantage
