Photoshop's effectiveness will vary based on your needs and what you want to achieve. When I'm working on a photo, I rarely use the zoom level, because I generally have a three- to six-foot print on my screen. I use layers to group most everything into an image. Because of the nature of digital photography, Photoshop is a perfect place to start because its main function is to enhance your existing photos.

After that, Photoshop is an excellent tool to expand your creative abilities, but it can also be used to create new photos. (See Book III Chapter 4 for more about working with images.) Tools in the lower-left corner of the Photoshop window provide menus that enable you to work on multiple layers and create masks, using powerful tools that control everything on a layer. ## Opening and Saving Your Work

Photoshop starts by creating a new work area, opening your images, and displaying the image area with the File Open window at the bottom of the workspace. The File Open window provides a list of the files and images that you have on your computer that you can use to work with. You can either browse through them or search for the image you want. When you click on the image, it opens in the window. Figure 3-1 shows the File Open window. FIGURE 3-1: You can open images directly from your hard drive, or browse through them in folders. After you locate the image you want to work with, you can move it to the image window. The image in your work area can be anything — a web page that you uploaded, a picture you took, or a design you created in a graphics program. The picture is in an image window. After you open an image, you can work with it or save it. In this book, I show you how to work with images. You can move images and rotate them around on a layer, resize them, change their brightness, and even change their color. If you want to save your work, use the File Save As command. You also find the Save command on the Edit menu. In addition to saving the current image, you can save one or more images at the same time. You can save them as a new file with a new name, into an existing file with a new name, or even into an existing document or presentation. You can save as a JPEG, a GIF, a PDF, a TIFF, or even an EPS. You can choose

Despite the advent of multifetal and maternal intensive-care technology, the rate of preterm birth has increased over recent decades. Antenatal interventions to prevent preterm birth (PTB) have involved both medical and nonmedical approaches. Knowledge of the biology of both pregnancies and membranes is important to assess when considering a potential intervention. The etiology of PTB, as well as life-threatening complications of prematurity, suggests that the benefits of PTB are greatly outweighed by the risks of complications. The goals of any intervention for PTB are to delay the process of spontaneous labor, decrease cord blood retention, maintain near term gestation, and minimize the incidence and severity of PTB-related complications.

Crown Court- The Sanity The Sanity is a brand created by Freda Ward, who has had a successful career as a face and body sculptor since the early 1980s. The Sanity's philosophy is designed to protect the skin from the damaging effects of the environment by creating an environment where the skin can continue to undergo its normal healing and renewal processes, and keep pace with its normal day to day activities. Key to the Sanity's philosophy is the recognition that different people are affected by the environment in different ways, and that as a result of this, the skin care practices recommended by a particular skin care company may not benefit all people equally. As a result, The Sanity recommends that, with the exception of those people who have a genuine need to use a particular product, it is preferable to use skin care products that are suitable for the general public and will benefit all skin types. The Sanity's Formula To this end, the Sanity has created a range of products that it can recommend to the general public. While these products are not specifically designed for facials, they are designed to cleanse the skin, soften any dry or tough skin, combat excess oil, and re-balance the skin. The Sanity recommends using one of these products every day in conjunction with its own Facial Treatment. The Sanity's Facial Treatment The Sanity's Facial Treatment combines all the benefits of the Sanity's products, as well as using specific techniques to cleanse the skin, exfoliate and tighten the skin, and remove impurities. The Sanity's Facial Treatment is the only treatment to recommend using clean pads or sponges to massage around the face, neck and chest to remove impurities and stimulate circulation.
