Pigeon Planner Crack+ Torrent

Pigeon Planner is a feature-rich software application dedicated to managing pigeon details in a database filled with information such as name, image and color. Setting up the program takes little time and does not require special attention. Its interface is made from a regular window with plenty of options that shouldn't be too difficult to figure out. When adding a pigeon to the list you can specify the color, sex, strain, loft, sire, dam, image, and extra information. The app displays a hierarchical view of the pedigree sire and dam, along with pigeon relationships. The "Results" section records contest data, including date, outcome, coefficient, sector, type, category, wind and weather. Importing this information from plain text documents is possible. Additional details may be added to settle a pigeon's breeding and health status (medication), while media files can be inserted into the database as well. As far as program settings are concerned, Pigeon Planner is able to create automatic backups on a regular basis. It supports multiple UI languages (app restart is necessary) and lets users customize the appearance (e.g. theme, hide navigation arrows). Furthermore, it is possible to prepare pages for printing, opt out of columns and insert different ones instead, and so on. The software application is pretty light on the system resources, using low CPU and RAM. It has a good response time and works smoothly, without causing the OS to hang, crash or pop up error dialogs. All in all, Pigeon Planner should meet the requirements of pigeon lovers who are looking for a simple and efficient method to record pigeon details in a configurable interface. There is also a portable counterpart available, if you want to bypass the installer and directly run the app from a pen drive. Key Features: • View pedigree tree and reports • Print results • Multiple languages • Export to Excel • Backup and restore • Importing data from plain text files Pigeon Planner Requirements: Pigeon Planner is a freeware application. It can be run in a 64 bit Windows environment. It is released as open source and has no known, closed source components. Pigeon Planner Versions: The latest version of Pigeon Planner is 1.0. You can download and update to this or any other version of Pigeon Planner below: Pigeon Planner 1.0.0 - Pigeon Plan

Pigeon Planner Full Version

#3: Pigeon Planner™ v1.01 #4: Pigeon Planner™ Portable v1.01 Peer to Peer Spreadsheets: Peer2Peer Databases with Spreadsheets Peer to Peer Spreadsheets: Peer2Peer Databases with Spreadsheets Peer2Peer Spreadsheets Peer2Peer is a tool that allows users to easily share work with other users. Peer2Peer is a tool that allows users to easily share work with other users. This tool is designed to be used with spreadsheet software to enable users to perform their work collaboratively. It contains a built in file database, which makes it easy to keep track of who has changed what, and who is the latest version. It is very easy to use, just start up the database, add some rows and columns. You can either have a read only connection or you can save your work to the database. All changes are stored on the server. All in all it's a great tool, that makes creating a public spreadsheet very easy. Description: Peer2Peer is a tool that allows users to easily share work with other users. Peer2Peer is a tool that allows users to easily share work with other users.
