I am working on a Xamarin project using UITest. I have been struggling to test and simulate gestures such as "Tap in". Does anyone know how to accomplish this? For example, a custom button, when clicked, should cause the UI to be "clicked" and a message to be displayed on the screen. I am using Xamarin.UITest. A: I am not aware of any integrated solutions in Xamarin.UITest. You can use Xamarin.UITest.Hardware.Driver to simulate touches on the UI, if you have any information about your UI. For example, for the Tap in use case, you can simulate the tap event on the button using code like this: Device.Simulate("tap", element, "Bottom Right", 1000); City of Angels Cafe The City of Angels Cafe is a restaurant and bar located in Angeles City, Philippines.
