image-based rendering tools are a different kind of technology, but with the same kind of quality and reliability. the key to image-based rendering is an efficient pipeline, and octane 's built it in. octane enables real-time rendering of interactive scenes while maintaining native speed. it's a tried and true approach for user-created content. it supports the following physical approximations: ray-casting wavefront-based ray-tracing subdivision surfaces explicit surface representation subsurface scattering fractional importance sampling bsp-based acceleration gpgpu acceleration with cmr you can now create your own real-time raytraced renderer. you can drag, drop, zoom in, out of, and reuse various 3d primitives. you can also create your own materials and materials can be shared, imported, and exported. this is just the beginning of the possibilities, said ulrich lang, founder, and chief technology officer of cmr. so far only the unity plugin supports a custom shader language, but the upcoming webgl shader support will soon change that. autodesk autocad 2019 is the first autodesk product to run octanerender on windows." "this is a big milestone for anyone who does 3d modeling or renders in autodesk applications," said c. jim minear, president of octanerender. "we're delivering on an important promise: when we launched octane we never said it would be available only on mac. we've built a beta version for windows now. we're excited to ship autodesk autocad," he added. particular attention in the final autodesk autocad release is the integration with octanerender, said minear. this is a big milestone for anyone who does 3d modeling or renders in autodesk applications," said c. autodesk autocad 2019 includes octanerender for windows 32-bit and 64-bit on windows 10 and windows server 2016. in addition, there is a new plugin by softimage called the rtt plug-in for 2016. for the first time, this option is also supported on windows.with all that, the development of autodesk autocad using octanerender can provide a great impetus to the rapid development and updating of existing models. users will be able to accurately see and make changes to their models without having to go back and forth. these changes will be maintained in real time and will not be lost. they will also be safely stored in the cloud, with no need to use expensive software. octanerender has been tested with autocad versions 2013 through 2019.
